REEVALUATION OF "POSSIBLE" ICBM ACTIVITY NEAR

NYANDOMA, USSR*

Further study of KEYHOLE photography negates earlier reports of suspect ICBM activity 3.5 nautical miles (nm) southeast of Nyandoma, at 61-37N 40-18E. $\underline{1}/\underline{2}/$

The extent of construction at the installation in question is not consistent with that at known ICBM support facilities. Furthermore, in an 18-month period during which basic construction apparently was completed and limited expansion undertaken, no SAM site or ICBM launch area construction is evident.

	The installation first appears on photography of Mission	
25X1D	, at which time it was under construction. Basic construction	n
	appeared to be completed at the time of Mission However	r, 25X1D
25X1D	Mission shows some further building expansion north	:h
	of the rail terminus at the installation.	
		X1D

*This information previously disseminated by cable as Pre-MCI 7, Mission
